EDUCATION

Master of Science in Artificial Intelligence Systems September 2025 - Present
EPITA (École Pour l'Informatique et les Techniques Avancées) Paris, France

B.Tech., Major in Electronics and Communication Engineering 2020 - 2024
Padmasri Dr. B. V. Raju Institute of Technology India

EXPERIENCE

AI Automation Specialist April 2025 - June 2025
PrimeloopAI (Freelance) Remote
Specialized in developing AI-powered automation solutions for various clients, streamlining workflows and integrating intelligent systems to enhance operational efficiency. Open to on-site and hybrid work arrangements.

Founding AI Engineer April 2024 - April 2025
Aspireit Remote
Designed and deployed AI-driven backend systems for a multi-feature platform, cutting recruitment time by 30% and boosting user satisfaction. Led architecture decisions and coordinated a remote development team to deliver scalable product enhancements.

Software Engineer - AI/ML March 2024 - April 2024
micro1 (Freelance) Remote
Fine-tuned top-tier LLMs for code generation tasks, improving accuracy by 15% and reducing training time by 50% using optimized prompt engineering and data strategies.

AI Developer August 2023 - March 2024
KPVDR BOTSAPI PRIVATE LIMITED Remote
Developed an AI assistant for messaging platforms using LLMs and NLP, improving communication efficiency and boosting user engagement by approximately 30-40%.

PROJECTS

MultiAgent AI App [GitHub](#)
Built a Streamlit app integrating AI agents for video analysis, financial data, and PDF querying, enhancing user interaction through a modular design.
Technologies: Python, Streamlit, Groq, ChromaDB, YFinance

Voice Agent [GitHub](#)
Developed a low-latency (around 500ms) voice assistant with customizable personas, supporting applications like technical interview practice and personalized conversations tailored to any interest or role.
Technologies: Python, TypeScript, Next.js, LiveKit, Deepgram

CLI Tower Defense [GitHub](#)
Created a terminal-based tower defense game in Go, enabling Large Language Models (LLMs) to compete against each other in real-time strategic battles. Designed with flexibility to integrate various LLMs via APIs, such as OpenAI and Gemini, allowing seamless substitution of models.
Technologies: Go

SKILLS

Programming	Python, Golang, MATLAB, R, Salesforce Apex, JavaScript
Frameworks	Flask, Django, LangChain, LangGraph, CrewAI, AutoGen
Libraries	TensorFlow, PyTorch, Transformers, Hugging Face, Agno
Tools	Git, Docker, AWS, Power BI, Tableau, Hadoop, Apache Spark
Databases	MySQL, PostgreSQL, MongoDB, AWS Redshift, SQL Server

LANGUAGES

English	Fluent (Professional working proficiency)
French	A1 (Currently learning)
Telugu	Native
Hindi	Native

ACHIEVEMENTS

- Winner, Smart India Hackathon 2022
- Runner-up, MEDCUORE Tech Innovation Challenge 2023

ADDITIONAL INFORMATION

Valid French student visa with work authorization (up to 964 hours per year)
